RESEARCH AFTERNOON · LUND UNIVERSITY

AI & Data in *Social Science* Research

2 December · 16:15–18:00 · Världen, Geocentrum 1

Lund from orbit: Copernicus Sentinel-2 imagery, courtesy of SESAC · Space-time paths after T. Hägerstrand

Join us for an afternoon exploring how we use AI and different types of data in social science research.

Through short research presentations, we will share examples of ongoing work and discuss methodological choices, opportunities and challenges.

How do we combine different data sources?

What role does AI play in analysis?

And how do we evaluate and interpret the results?

DATE AND TIME
2 December, 16:15–18:00

VENUE
Världen, Geocentrum 1

The presentations will be followed by an informal gathering with opportunities to continue the conversation and meet colleagues.

Everyone interested in AI, data and social science methods is welcome!

The event is jointly coordinated by the Department of Human Geography (KEG), SESAC, Hägerstrand Lab and the methods centre at the Faculty of Social Sciences (SFAK).
